

Your NGN CPE Solution Provider

Cable Extreme Utilization
Plug & Play with Coaxial cable
A Compact HCNA Coaxial LAN Adapter
Providing powerful Broadband connection
128Mbps Data Rate

Product Features...

- 128Mbps HCNA Coax port as Home Network Backbone by using existing Coaxial cable
- Two 10/100M Fast Ethernet ports for FTTH, DSL/ Cable Modem, and Ethernet Terminals. Such as, PC, STB,... etc
- Distance up to 4000 Feet over RG59 wires
- Filter Built-In to eliminate noise from TV
- QoS Priority and Mapping supports
- Plug & Play
- Compact Size Design

HPCE-322

(Part Number: 555-HPCE-322)

Alpha Telecom HPNA 3.0 HCNA Ethernet Bridge,

HPCE-322, Enables you to setup your private network at home with your existing coaxial cable.

No additional network wiring is necessary. You might just find a coaxial connector in the wall, put the coaxial plug into the connector. You can then be ready to access Broadband Internet networks.

No extra Utility, no setting is needed. Just link to Plug & Play.

Via the RJ-45 Ethernet port, you can connect HPCE-322 with the Ethernet-Interfaced devices such as STB (Set Top Box), Camera Server, or Switch/Hub. The high speed of 128Mbps will bring you to enjoy the Video-On-Demand (VOD) or Multimedia-On Demand (MOD) services.

With HPCE-322, SOHO can even quickly extend or flexibly change the existing LAN environment. Reducing most rewiring works.
