New Tech Industries, Inc is a Telecommunications Manufacturer and Distributor founded in 1982 by Harry Rose and Jim Pardee.

New Tech has grown tremendously from its humble beginnings in 1982 as two guys with two trucks selling at area flea markets. There was no fax, no email, no www just all kinds of stuff sold direct to the consumer.

New Tech Industries is now a full service stocking Data Network Fiber CCTV Distributor. The telecom, video, data and security world has merged today into one large market. Contractors and installers now do it all and New Tech Industries is a one-stop source for all their needs.

Sales Tax - Collected in Florida, California and some other jurisdictions.

Payment Terms – Credit Card (US only), Paypal, Wire Transfer, Net 30 and Net 15 with approval.

Wire Transfer – ABA: 266086554 ACCT: 3200389692 SWIFT CODE: CITIUS33

Shipping Carriers – UPS, Fedex, USPS

Ship To – USA, APO, FPO, Bahamas, Jamaica, Caribbean, Europe and Australia

Government – Business Classification: Small Business Cage Code: 3EKC1 DUNS: 063414908 FID: 592175005

Typographical Errors

In the event a product is listed at an incorrect price due to a typographical error, entry error or error in pricing information received from our suppliers, New Tech shall have the right to refuse or cancel any orders placed for said product(s).

MIG “The Premier Multiport Jack”

610-120 MIG Category 5E

\$2.29

- Press-Fit PCB Technology
- Small Form-Factor (Perfect for High Density Installations)
- Gold Plated Prongs
- Phosphor Bronze IDC Contacts
- Fire Retardant Plastic Housing
- UL Approved

Press-Fit Technology (PFT) is a solderless connection method that force fits a contact pin into the plate through a printed circuit board. The radial pressure produces a high quality and gas-tight electrical connection, which insures data reliability jack after jack.

Almond Black Blue Green Grey Ivory Orange Red White Yellow

MIG “The Premier Multiport Jack”

610-130 MIG Category 6

\$3.69

Both the 610-120 and the 610-130 can be terminated in one motion using the 610-661 “Terminator” 4PR Tool.

Designed for superior performance our MIG Cat6A shielded data jacks are easy to install and are compatible with all our MIG plates and panels.

- CAT6A Channel Performance
- Die-Cast Housing
- Effective Protection from EMI and Alien Crosstalk
- Press-Fit Technology Applied, No Solder
- Tool-Less Design, when using the IDC Cap
- Compatible with both 110 & Krone Punch Down Tools
- Meets ANSI/TIA/EIA Standards
- UL Listed

PATCH CORDS

Performance Certify and Troubleshoot LAN Hardware Cabling (10/100/1000)
Easily test patch cords or any connection on your network.

- Print reports in excel format for client distribution
- Test Existing cables for higher speed compatibility
- Spot faulty wiring closet jumpers from your office wall outlet
- Detect worn connectors and faulty terminations
- Identify excessively noisy cables
- Decode 10/100 GIG PCs, switches and hubs for advertised capability
- Go "inline" between two LAN devices and identify the negotiated speed

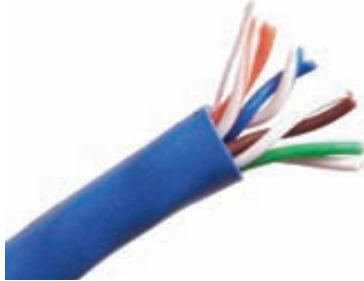

602-800 "The Certifier"

Low Loss LMR Bulk Cable

Our LMR series is designed for low loss general purpose applications and Flexible outer conductor for a superior bend radius. It is more flexible than standard polyethylene jacketed LMR Type. This cable is UV resistant and has a PVC jacket for indoor / outdoor use. It offers the lowest loss of any flexible cable and excellent phase stability even with bending and through temperature variances. This cable has 90db RF shielding for ultimate signal preservation.

Speaker Cable

SPEAKER CABLES

Looking for high quality speaker cables but don't want to pay for over-priced products? We offer a line of high quality speaker cables with color-coded inner conductors that are ideal for home theater and whole house audio. Our audio cables are oxygen free and feature PVC and CMP jackets, ensuring exceptional performance for years to come.

Please call your salesperson for any sizes or put ups you do not see listed here as well as Plenum pricing.

Direct Burial OFC Audio Cable

Our direct burial audio cables are perfect for outdoor speakers, low voltage lighting and many other outdoor or direct burial applications. Our outdoor direct burial audio cables feature a specially formulated black PVC jacket that is sun resistant and provides protection against water damage. Cable is UL Listed and comes with a high strand count for optimal performance.

Horizontal Fire Stop

The Split Sleeve System™ is a UL Classified retrofit solution designed for sleeving cables which have already been installed without a sleeve and are in violation of the firewall. Installers do not have to pull cable back out of the walls or floors after failing an inspection because of the unique Split Sleeve System design (a threaded, rigid conduit cut in half) which can be fitted around existing, installed cables.

Cables found the day before an inspection.

Sleeved without cable removal in 15 minutes.

SSS-1	1" Split Sleeve	\$79.00
SSS-2	2" Split Sleeve	\$99.00
SSS-4	4" Split Sleeve	\$149.00

- Includes Fire Putty
- Documentation
- Warning Labels
- UL Rated

The Smooth Penetrator is used in new horizontal cable installations for walls rated up to 2 hours. No caulk is required between the sleeve and the wall. Our most economical product, it makes firewall penetrations neat, clean, and efficient. This design allows for cables to be pulled through the firewall without any "attendance", even at a 45 degree angle. The sleeve acts like a roller in the wall while cables are being pulled. A real time saver!

New Construction Horizontal Fire Stop

SP1	1" Smooth Penetrator	\$25.00
SP2	2" Smooth Penetrator	\$35.00
SP4	4" Smooth Penetrator	\$69.00

- Includes Fire Putty
- Documentation
- Warning Labels
- UL Rated

Floor Enclosures with Acrylic Doors

FLOOR ENCLOSURES

The 400 Series Floor Enclosures offer great features at an economical pricing structure. These cabinets come fully assembled or in knockdown form for easy transport.

- Vented on all panels for excellent air circulation characteristics.
- Top panel features cutouts for fans and cutouts for cable access.
- Platform features cutouts for cable access.
- Features 4 fully adjustable internal equipment cage nut rails for #12-24 mounting screws in EIA universal spacing.
- Includes front door, rear and side panels, leveling feet, casters, grounding bus bar, 2 pre-installed 80 CFM fans and cage nuts and screws.
- Acrylic framed reversible door.
- Meets or exceeds EIA 310D standards.
- Electrostatic microfinish paint.

Minuteman UPS Systems

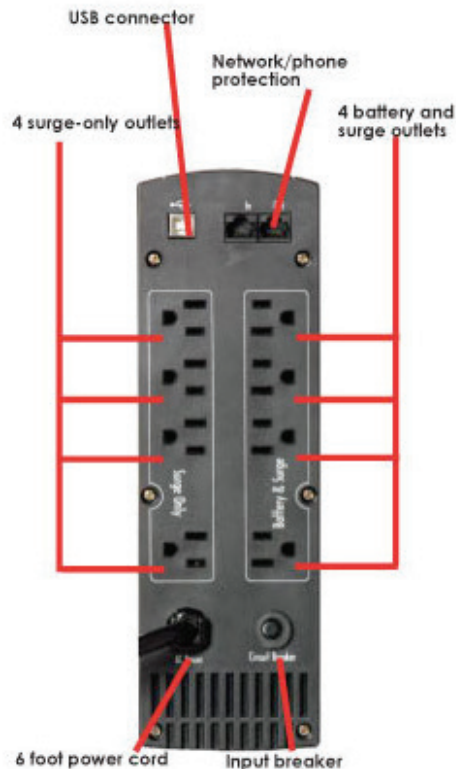

The Minuteman EnSpire Series UPS is a low-cost high performance UPS line that provides the features needed to protect your valuable equipment. The EN400 and EN600 units each have six outlets, three provide battery support along with spike and surge protection and three with spike and surge protection only.

801-100 EN400VA 400VA/200W	\$49.00
----------------------------	----------------

801-101 EN600VA 600VA/300W	\$59.00
----------------------------	----------------

The Minuteman Entrust Series UPS provides users all the features usually available in higher-priced UPS products to protect your valuable equipment: automatic voltage regulation, spike and surge protection, and battery backup.

Each unit has four outlets that provide battery support along with spike and surge protection. There are an additional four spike and surge protected outlets for accessory devices that don't require battery support. There are even two outlets that are specifically spaced to support transformer block items.

801-107 ETR1000 1000VA/600W	\$189.00
-----------------------------	-----------------

801-108 ETR1500 1500VA/900W	\$269.00
-----------------------------	-----------------

Minuteman UPS Systems and Power Strips

The PRO-RT Series is a value-priced, yet feature-rich UPS incorporating line-interactive technology that preserves battery power by providing voltage regulation during voltage sags and/or surges. The PRO-RT Series can be used to support servers, telecom or VoIP systems, security systems, plus many other applications.

An LCD display provides visual notification of power status, including input voltage, frequency, percent of battery charge, estimated runtime, plus many other conditions.

EZ-RJ45 Modular Plugs

The patented EZ-RJ45® Connector simplifies twisted pair terminations by allowing the wires to be inserted through the connector and out the front. This allows the technician to easily verify the proper wiring order. Electrical performance of the termination is optimized by pulling the connector down over the cable jacket and seating it tightly in the rear of the connector. Reducing the distance between the wire twists and contacts improves performance! Reduces scrap, No wasted crimps, More reliable, Higher performance. Crimp with the patented EZ-RJ45 Crimp Tool...crimps and trims in one cycle. Manufactured in the USA. Patented.

Fiber Optic Patch Cables

Our extensive range of fiber optic patch cables are terminated with state-of-the-art connectors and available in any combination of ST, SC, and LC with PC, UPC or APC polish types to meet your standard or custom configurations. Our fiber optic assemblies have been geometrically inspected with interferometers and tested with automated insertion loss and reflection test equipment to ensure exceptional performance.

Bulk Distribution Fiber

- Rated for indoor use, this cable is perfect for backbone, horizontal, and intrabuilding applications.
- A 900- μ m coating provides easy stripping and handling.
- Flexible subunit construction enables easy routing of grouped fibers.
- Construction consists of: flame-retardant outer riser or plenum jacket, binder, subunit jacket, subunit aramid yarn, strength member, tight-buffered fibers, and a ripcord.

Unicam Fiber Optic Connectors

Fast Connectors are pre-polished, field installable connectors that eliminate the need for hand polishing in the field. Fast Connectors provide an immediate termination to either single-mode or multimode fibers and are color-coded for ease of fiber identification. A factory-installed wedge clip (included with each connector) holds the clamping mechanism open while the fiber is inserted. Once the fiber is in place, the wedge clip is removed and discarded.

Fusion Splicer and Cleaver

INNO Instrument Smart High-End ARC Fusion Splicer

IFS-10 splicer is the most reliable and user friendly Core Alignment splicer in the world.

Call your salesman for pricing on this and other fusion splicers and cleavers. The IFS-10 is available in kit form with carry case, high end cleaver and assorted fiber tools.

INNO Fiber Master IFS-10 Core-Alignment Fusion Splicer with the New DACAS (Digital Analysis Core Alignment System) is one of the most dependable splicers on the market.

The Fiber Master splicer features a rubberized design for field use in harsh weather conditions.

The IFS-10 has a friendly, intuitive GUI (Graphical user Interface) with a 5 inch color LCD screen that is easy to see and is adjustable for front and rear splicer orientation.

The sizeable, large battery capacity at full charge allows for up to 350 splices.

INNO Instrument VF-78 Fiber Optic Cleaver

- True one-step operation to complete the cleaving and collection of waste fiber shards Automatically
- Convenient and quick to operate! - either hand-held or on table/workshop surfaces
- Very easy fiber setting and placing and, no need for blade height adjustment, therefore improving work efficiency and low maintenance cost
- Smart design of pressure pads prevent the fiber from damage by the return of the blade carriage
- Each point of the blade can be used not only over 3000 times but each blade has 16 cutting points, providing over 48,000 cleavers

Fiber Optic Visual Fault Locator and Prep Tools

Fiber Optic Cable Checker
Visual Fault Locator

- The VFL Series is a low-cost, streamline basic fiber test tool which is easy to handle and easy to store.
- Singlemode and Multimode Operation - Find breaks, bad splices, tight crimps, poor components, and bad connections.
- Optical Output Port - Universal connector that accepts any 2.5 mm ferrule such as ST, SC, FC.
- LED Indicators - The VFL provides LED indicators for active Laser mode (continuous or modulated), and Low Battery.

Fish Rods

Klein Fish Rods

910-067	12' Fish Rod Set	\$49.95
910-070	24' Fish Rod Set	\$79.95
910-072	15' Glow Rod Set	\$59.95
910-075	25' Mix Rod Set	\$79.95
910-076	3 Rod Attachments	\$29.99

- Use to install wires above ceilings, through walls and under carpets and raised floors.
- 1/4" diameter Fish Rods are flexible yet provide excellent rigidity for extended distance stand out.
- Connect individual sections end-to-end to create a variety of lengths.
- Threaded connectors are beveled on both ends to prevent snagging and hang ups on obstructions.

Telescoping Gopher Pulling Poles

310-860	2' – 16' Gopher Pole	\$69.95
310-860HD	2' – 16' Gopher Pole	\$99.95
310-861	3' – 26' Gopher Pole	\$89.95
310-861HD	3' – 26' Gopher Pole	\$109.95

- For use in hard to reach ceilings, floors and crawl spaces
- Very light and easy to carry
- 1" diameter, 2' long collapsed - 16' extended
- Non-conductive, wound filament fiberglass won't rust or corrode
- Polyester resin baked enamel coating
- Uses all exchangeable attachments supplied with Push-Pull rods
- Gopher Pole
- HD poles are heavier duty than the standard. The fiberglass is thicker and also heavier weight.

Fish Tapes

Klein High Strength Steel Fish Tapes

- Permanent, laser etched 1' increments on the tape allow you to more accurately measure the depth of conduit runs and determine the amount of tape left to pay out.
- Polypropylene case and handle are extremely durable and offer the maximum in shock and impact resistance.
- Raised finger grips help transfer 100% of the winding power from your hand and fingers.
- Round inner ring design provides a smooth, consistent and comfortable surface for winding and rewinding.
- The unique sloped handle optimizes the position of your hand for quick hand-over-hand rewinds and allows a more level payout of tape on the backswing while feeding conduit.

910-047	1/8" X 50'	\$21.95
910-050	1/8" X 125'	\$59.95
910-052	1/8" X 240'	\$89.95
910-055	1/4" X 25'	\$16.95
910-057	1/4" X 100'	\$104.95

910-058 6 Loop Wire Puller
\$19.00

- Polypropylene case and handle are extremely durable and offer the maximum in shock and impact resistance.
- Raised finger grips help transfer 100% of the winding power from your hand and fingers.
- Non-conductive, composite fish tape slides easily over existing wires and through multiple bends.
- The lightweight and strong fiberglass composite tape resists harsh elements and is strength rated up to 200 pulling pounds.
- The 13" case diameter means you can reel in 15% more tape in a single revolution vs. a standard 12" case.
- Durable 7" leader helps push through crowded conduit.

Klein Fiberglass Fish Tapes

910-060	3/16" X 50'	\$139.00

CCTV Security

There are 1000's of different cameras on the market and it is very confusing trying to find a high quality camera at a reasonable price. Cameras all look the same but the chipset, IR quality, and the lens makes a big difference. We have narrowed our focus to cameras that are customer favorites. These cameras are the most popular and because of our volume purchasing we can offer them at an aggressive price.

Belden Coaxial Connectors

New Tech stocks the Belden DB "Double Bubble" and the F-Conn series coaxial connectors. The DB connectors are known for their very competitive price and the double seal makes them perfect outdoor F or BNC use. The F-Conn is a more traditional compression connector but the visual cable entry makes these connectors much easier to terminate.

Toggler Snaptoggle and SnapSku

Toggler Snaptoggle Mounting Toggle and Screws

These are the best toggle bolts on the market they hold more weight and are easier to install than anything else. If you are working in drywall make sure you are using these bolts.

Ideal for Heavy Loads in Hollow Walls, Ceilings & Floors

TOGGLER toggle bolts pre-install without a bolt and can be installed with a screw gun. This allows one-person installations (instead of two), saving time and money. It's like having an extra pair of hands.

Ideal for mounting: Flat Panel TVs, DSS Antennas, TV Mounts, Solar Panels. Use on: Cinder Block, Drywall, Plaster, Stucco. Fiberglass

SKU	DESCRIPTION	PRICE
221-106	¼" Toggles and Bolts 10 Pack	\$9.95
221-126	¼" Toggles Only 50 Pack	\$24.00
221-126B	¼" x 2 ¼" Screw 50 Pack	\$5.75

The TOGGLER® SnapSku® anchor is the industry's first self-drilling drywall anchor that does NOT destroy the drywall when using the anchor.

It is a true anchor, not just a small screw in a big screw like our competition! When activated with a screw, the SnapSku anchor opens with an audible "pop", locking the anchor on the wall.

- 100 Self-Drilling Drywall Anchors
- 100 #6 x 1-1/4" combo-head screws
- Strongest/Safest Self-Drilling Drywall Anchors
- Removable - won't destroy wall
- "Pop" sound indicates correct installation
- NO drill needed
- Holds up to 65lbs in 1/2" drywall 95lbs in 5/8" drywall

HDMI Over LAN Extenders

Transmit HDMI 1080P over a Video LAN

Extends HDMI Signal over the LAN up to 400-Meter (1,312 ft) using CAT5E. Hundreds of displays are possible with the addition of a LAN hub/switch and HDE-R receiver modules. Embedded infra-red (IR) control path allows user to control HDMI sources remotely. Kit includes TX & RX module with built-in IR, IR transmitter/receiver, HDMI cable & power adaptors.

**Ideal for Digital
Signage Applications**
