

Faster Fiber Cleaning & Avoid IPA Exposure

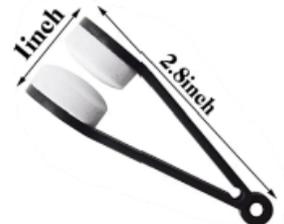

**PATENT
PENDING**

Fiber Optic Wet/Dry QuickCleans cleans fiber cable faster and also avoids damaging skin exposure from repeated use of isopropyl alcohol (IPA) and other cleaning agents. The patent pending QuickCleans can be used wet or dry and work easily with any professional fiber optic fluid pump dispenser. The tweezer design includes lint free pads for superior cleaning and a loop tie down on end to keep secure. They are made of non-woven, high density, hydro-entangled, 45/55 cellulose/polyester blend for optimum purity. The QuickCleans have excellent absorbency and are tested to over 100 uses each before they can be discarded. Each package includes ten QuickCleans.

Features

- Patent pending tweezer design saves time when cleaning fiber cable
- Avoids damaging skin exposure caused by fiber optic cleaning fluids
- Works easily with any professional fiber optic fluid pump dispenser
- Provides superior cleaning for any fiber optic cable
- Excellent absorbency, lint free, high density, non-abrasive pads
- Tested to provide over 100 uses per QuickClean
- Loop tie down on end to prevent from getting lost
- Ten Wet/Dry QuickCleans per pack
